Invitation

Molecules and Light 2017 

Electron Transfer in Chemistry, Biology, and NanoScience - 2018 Conference 

September 19th through 22nd, 2018

Institute of Physics, Polish Academy of Sciences

Dear Fellow Researchers, while wishing you interesting Electron Transfer in Chemistry, Biology, and NanoScience meeting, we describe in the following sections all pertinent information. However, do not hesitate to ask our wards and/or supporting organizational staff.  regards, Scientific and Organizational Committees.  meeting will be focused on being an international forum for the presentation and discussion of frontier research in Electron Transfer in Chemistry, Biology, and NanoScience. We support and encourage the discussions to take place after each scientific talk, where meeting attendees debate the ideas presented to foster a dynamic scientific exchange. Since we are looking for excellence and scientific leadership, the number of meeting participants by invitation will be limited. The leadership starts in the mind, where ideas precede actions. We aspire to formulate leap forward questions, a big questions programme, rather than communicating transient findings. All interested in taking part in the meeting are kindly requested to complete the [registration card](#) including the title of the your contribution and indicating preferable form of presentation (short oral communication or poster). The organizers reserve the right to qualify the presentation as oral communication or poster (depending of the number of participants).
